Alarm Center - User manual PS-Data 28. August 2014 Side 9 4.3. SQL server installation The Alarm Center server uses an SQL server to store all alarm information, configurations etc. As a default is the "Microsoft SQL server 2008 R2 Express" used. It can handle a data size up to 10Gb data which is normally enough for the Alarm Center.

### Alarm Center - User manual

Manual fire alarm activation requires human intervention, as distinct from automatic fire alarm activation such as that provided through the use of heat detectors and smoke detectors. It is, however, possible for call points/pull stations to be used in conjunction with automatic detection as part of an overall fire detection and alarm system.

### Manual Call Point

alarm panel continuously monitors all connections between detectors, manual call points and sounders and also checks its own power supply and back-up batteries for faults. If a fault is detected anywhere on the system, the panel responds by illuminating one or more of
