Hello all, I'm looking to eventually query my Photon from my Android phone without requiring the cloud connection to be operational. I'm attempting to use a TCP connection to communicate between my Android phone and the Photon (where the phone is a wireless hotspot not connected to the internet). Whenever I attempt to get them to connect to one another, I can get the client (Android app ...

Using TCP to communicate between an Android and Photon ...
I'm using a default Photon Cloud App, is there any way to obtain its ip? I tried using wireshark to capture packets, but pinging the IP that resulted from that just ends up timing out I feel pretty dumb now - I was missing the android.permission.INTERNET permission in my android manifest. Adding this fixed the problem. Thanks for the help!

Android can't connect using Photon Realtime — Photon Engine
The Photon has two DACs (Digital to Analog converters) onboard connected to pin DAC (A6) and A3, when you select analogWrite on those two pins you can set a value between 0 to 4095 (12bit resolution) and continous analog voltage will be applied at the pin output (not PWM), you can use it for controlling electronic devices that require precision analog voltage setting.
