Amazon.com: Basic Techniques of Ophthalmic Surgery, 2nd ed ...

Although many strictly surgical techniques have been described for permanent treatment of distichia, 6,34 noninvasive techniques such as cryo- and electroepilation have the advantage of preserving the eyelid margin and usually do not result in scarring, which distorts and adversely affects eyelid function. 127 All techniques aim to destroy the meibomian gland, thereby preventing hair regrowth. Destruction of a large percentage of the meibomian glands may result in qualitative tear ...
