But the child morbidity due to congenital and genetic disorders, already appreciable (Roberts, Chavez & Court, 1970; Roberts, 1975) and increasing both proportionately and absolutely, and the evidence that some of these increase in incidence with age, mean that there is a real basis for the enquirers' concern.

### Genetics and ageing in man | Journal of Biosocial Science ...

The Human as the Biosocial. Contemporary science considers the human being on the basis of two different dimensions of his existence: the biological and the social. Human beings appeared on earth as a result of a long process of development. As biological creatures, they still retain a close genetic connection with the animal world.

### The Human as the Biosocial - Marxists Internet Archive

Biosocial research on the family is now using various paradigms, such as quantitative and molecular genetic approaches, as well as the various methods in the field of social neuroscience. These approaches have identified mechanisms through which biological and environmental factors act and interact with each other.

### Biosocial Influences on the Family: A Decade Review

map where aDNA samples were excavated in Asia. One of our sequences came from ancient DNA extracted from the leg bones of the Tianyuan Man, a 40,000-year-old individual discovered near a famous paleoanthropological site in western Beijing. One of the earliest modern humans found in East Asia, his genetic sequence marks him as an early ancestor of today's Asians and Native Americans.

### Ancient DNA is revealing the genetic landscape of people ...

The simplest way to answer that question is to clarify what it is not — biosocial criminology is not one thing. It encompasses various flavors of psychology, biology, genetics, and neuroscience all aimed in the direction of understanding why human beings engage in a host of disreputable, dangerous, aggressive, and, of course, illegal behaviors.

### How criminologists who study biology are shunned by their ...
