Genshin Impact Constellations Guide: How to Get & What They Do

Constellation maps divide the celestial sphere into 88 parts, known as constellations, helping astronomers locate stars and deep sky objects. The star constellations that can be seen in the night sky depend on the observer’s location and season, and they change throughout the year. Out of the 88 constellations recognized by the International Astronomical Union (IAU), 36 are found predominantly in the northern sky, while the remaining 52 are located in the southern sky.

Constellation Map | Constellation Guide

They are: Aries, Taurus, Gemini, Cancer, Leo, Virgo, Libra, Scorpius, Sagittarius, Capricornus, Aquarius and Pisces. The Sun also passes through Ophiuchus and Cetus, but these constellations are not part of the zodiac. They belong to the Hercules and Perseus families respectively.

Zodiac Constellations | Constellation Guide

The Orion Constellation is probably one of the most well known and easily recognizable constellations in the night sky, easily spotted even by those who are not star-struck. Also known as the hunter, he stands proudly in the sky with his belt of three stars in a line shining brightly. Orion has a fascinating story with roots in Greek mythology.

Orion Constellation: The Ultimate Guide (2020) | Planet Guide

Apus represents a bird of paradise. The constellation’s name means “no feet” in Greek, referring to a western misconception of a bird-of-paradise as one not having feet. The constellation was created and named by the Dutch astronomer and cartographer Petrus Plancius in the late 16th century. AQUARIUS - THE WATER BEARER Genitive: Aquarii

This guide outlines all the constellations in the game, including all the stats each one of them gives. I have only included stats from the first level of each proc so you get the gist of what they do, also the flat damage numbers aren't 100% accurate since they scale off player damage bonuses.

Steam Community :: Guide :: Detailed Constellation Guide

There are currently 16 constellations available: 5 bright, 7 dim, and 4 faint. All constellations (except the faint ones) can be used to attune Rock Crystals, Celestial Crystals, and the Mantle of Stars as well as for enchanting via the Stellar Refraction Table.

Constellations - Official Feed The Beast Wiki

The zodiac constellations are the constellations that are located within a band that is about 20 degrees wide in the sky. This band is considered special because it is the band where the Sun, the Moon, and the planets all move. There are 13 zodiac constellations. Twelve of these are also used as signs for the zodiac calendar and astrology.
