CDC and ASPR have developed five COVID-19 Pandemic Planning Scenarios that are designed to help inform decisions by modelers and public health officials who utilize mathematical modeling. The planning scenarios are being used by mathematical modelers throughout the Federal government. Models can help evaluate the potential effects of different community mitigation strategies and help hospital ...

Causes. Factors that increase maternal death can be direct or indirect. In a 2009 article on maternal morbidity, the authors said that, generally, there is a distinction between a direct maternal death that is the result of a complication of the pregnancy, delivery, or management of the two, and an indirect maternal death, that is a pregnancy-related death in a patient with a preexisting or ...
