Consider for example a transportation construction project which promises to reduce everyone's travel time to work. How do we place a value on that travel time savings? This is one of the fundamental questions of engineering economics.

Introduction to Engineering Economics

engineering economics is that money generates money. You cannot compare \$10.00 today to \$10.00 a year from now without adjusting for the investment potential. A simple example would be to take the \$10.00 and put it in a savings account at 2% interests. After a year you have \$10.20 instead of \$10.00.
