The Quantitative International Comparison of Financial ...
Beck, Demirgüç-Kunt, Levine, and Maksimovic explore the relationship between financial structure-the degree to which a financial system is market- or bank-based-and economic development. They use three methodologies: · The cross-country approach uses cross-country data to assess whether economies grow faster with market- or bank-based systems.

Financial Structure and Economic Development: Firm ...
This is the first broad cross-country assessment of the ties between financial structure—the mix of financial instruments, institutions, and markets in a given economy—and economic growth since Raymond Goldsmith's 1969 landmark study. Most studies focus on developed countries and compare bank-based and market-based systems.
