Migrate the App Engine bundled services in your Python 2 app to Google Cloud services, third-party services, or other recommended replacements. Test your app after migrating each service. When you finish this step, your Python 2 app should no longer use any google.appengine APIs. Upgrade your app to be compatible with both Python 2 and Python 3.

### **Migrating to the Python 3 standard runtime - Google Cloud**

App Engine automatically updates to new release versions upon app deployment, but it will not automatically update the minor version. For example, your application might be deployed at Python 3.7.0 and later automatically updated to Python 3.7.1, but it will not be automatically updated to Python 3.8.0.
