The technology for color photography in the 1950's and 1960's was very primitive, so my father chose to process these photographs in black and white. He set up his own darkroom. He constructed his own enlarger, which consisted of a wooden box, a light bulb and a collection of lenses — how primitive in comparison to present “wonders of ...

Light + Lens Photography | Kingston Wedding Photographers

Low light – That huge aperture is a great advantage when photographing in low light. Street photography after dark is moody and atmospheric, and the best lens to capture this is a prime lens. Bokeh – The large aperture also comes with another benefit, namely bokeh. Using bokeh in street photography is undoubtedly an advantage.

Big sister was a little curious about her little sister but full of love! I absolutely loved capturing this sweet time of their lives.

Light & Lenses LLC | Portfolio - LIGHT & LENSES photography

The lens' focal length determines the magnification of the image projected onto the image plane, and the aperture the light intensity of that image. For a given photographic system the focal length determines the angle of view, short focal lengths giving a wider field of view than longer focal length lenses.
