Liver A Fictional Organ With

Nay, Liver is not necessarily about the liver at all, but instead a survey of the bilious, fetid human condition; the organ itself is the link that connects the lobules of each character into one stinking gestalt of unpleasantness that, Self stresses, is born completely voluntarily. Excruciating detail is the rule for this story cycle.

Liver: A Fictional Organ with a Surface Anatomy of Four ...

Liver is made up of four shortish stories, linked by the organ of the title, by their mostly London situ, and by the odd reoccurring character. The first is a waspish story of alcoholic decay, which with a surreal twist in the tail, seems to depict the whole human race as a bloated, self absorbed, cirrhotic organ.

Liver: A Fictional Organ With a Surface Anatomy of Four ...

About Liver. Will Self's remarkable new stories center on the disease and decay that target the largest of human organs: the liver. Set in locales as toxic as a London drinking club and mundane as a clinic in an ultraorderly Swiss city, the stories distill the hard lives of their subjects whether alcoholic, drug addict, or cancer patient.

Liver: A Fictional Organ with a Surface Anatomy of Four ...

Liver: A Fictional Organ with a Surface Anatomy of Four Lobes is the seventh collection of short stories by Will Self. The stories in the collection are all connected to the liver and was described by the author as "...a collection of two novellas and two longer short stories, all on a liverish theme. Each story features different people suffering from different forms of liver damage." Time Out was one of the first publications to review it and said... "This inspired collection of four stories u
