Optimization is a practical subject, although it is supported by a growing body of mathematical theory. Problems that require the creation of mathematical models and their numerical solutions arise in science, technology, business and economics as well as in many other fields.

Module Description - M373 - Optimization

M373 was the last module of my Maths degree. It was tricky in parts but, overall, a great module. There's two things that students get frustrated with on M373: the maths software Maxima, and the middle block of the course which contains some confusing algorithmic techniques.

Optimization M373 | Module Reviews | Open University

optimal feasible solution, or simply an optimal solution. Definition: The optimal set is the set of optimal solutions; that is, the set of feasible solutions at which the objective function takes on its optimal value (if it exists). Remark: In the above problem, the optimal value is 1 and the set of optimal solutions is all points on the unit circle.
