Project Gutenberg is a wonderful source of free ebooks – particularly for academic work. However, it uses US copyright law, which isn't universal; some books listed as public domain might still be in copyright in other countries. RightsDirect explains the situation in more detail.

## **Page 1 Of Document**

Normally, the first page, or cover page, of a document does not have a page number or other header or footer text. You can avoid putting a page number on the first page using sections, but there is an easier way to do this. If you don't plan to use sections in any other part of your document, you may want to avoid using them completely.

...

When publishers wish to distinguish between the front matter and the body, the initial title pages are blind folios, the front matter is numbered using lower-case Roman numerals (i, ii, iii...) and the first page of the body or main content begins with 1. The title page of the body, if present, is a blind folio; similarly, any section title pages (e.g., when the body is broken into multiple parts), are blind folios.
