Now in its third edition, *Principles of Pharmacology* presents content in a conceptual framework that maximizes understanding and retention and minimizes rote memorization. It takes students "beyond the disease" and deep into physiologic, biochemical, and pathophysiologic systems where drugs activate or inhibit these systems by interacting with molecular and cellular targets.

Pharmacokinetics. Ion trapping is the reason why basic (alkaline) drugs are secreted into the stomach (for example morphine), where pH is acidic, and acidic drugs are excreted in urine where the conditions are alkaline. Similarly, ingesting sodium bicarbonate with amphetamine, a weak base, causes better absorption of amphetamine (in stomach) and its lesser excretion (in urine), thus prolonging ...

Ion trapping - Wikipedia

The effect of the ethanolic root extract of *Rauwolfia vomitaria* on the histology of the ovary of female albino wistar rats was investigated. The animals were divided into 5 groups with 5 rats in each group. Group A was the control group while the other 4 groups (B, C, D and E) were experimental groups. Group A animals were given distilled water and normal rat feed, Group B
