Just like roasting meats, the Rival roaster's directions for baking require you to preheat the oven. Metal pans work best for baking in a roaster oven because they help brown the food and conduct heat better. Insert the roasting rack into the roaster and put the pan on that instead of putting the pans directly into the roasting pan.

Set the rack in the bottom of your roaster, and preheat it to your preferred cooking temperature. Rival roaster directions call for a temperature of 375 degrees Fahrenheit for a pre-basted bird, or 350F for a fresh one. You can take that down further if you wish, though the USDA recommends going no lower than 325F to ensure food safety.
