Solution-specific and project-specific settings are combined with the active Visual Studio settings. For example, you may have a blank project-specific settings file, but Solution Explorer is still nesting files. The nesting behavior is coming from either the solution-specific settings or the Visual Studio settings.

File nesting rules for Solution Explorer - Visual Studio ...

The solution user options file is used to store user preference settings, and is created automatically when Visual Studio saves a solution. When the environment opens a.suo file, it enumerates all currently loaded VSPackages.

Solution User Options (.Suo) File - Visual Studio ...

A solution is described by a text file (extension.sln) with its own unique format; it's not intended to be edited by hand. Visual Studio uses two file types (.sln and .suo) to store settings for

Add New File - Visual Studio Marketplace

Yes with Visual Studio we can directly add the folder or files without adding it manually one by one in simple steps. First copy the files to the project folder in the explorer, just copy the files alone or if required the folder as well to the project solution folder (just do a simple ctrl+c and ctrl+v) as shown below.

How to add existing folder or directory to Visual Studio ...

Selecting a *.sln file opens a MSBuild-project. It will load the referenced *.csproj projects and sibling or descendant project.json files but no other project files that are referenced from the solution file. Selecting a folder will make VS Code scan for *.sln, project.json and *.csx files (C# scripts) and VS Code will attempt to load them all.
