The Guardian Of All Things

The Guardian of All Things is a sweeping scientific history that takes us on a 10,000-year-old journey replete with incredible ideas, inventions, and transformations.

The Guardian of All Things: The Epic Story of Human Memory ...

The Guardian of All Things is the fascinating story of humanity's quest to record its memories for the future. From cave paintings to microchips and beyond, with detours for the "memory theatres" of the Renaissance and modern studies of the brain, Malone mostly examines the exterior technology of memory, but his reflections on the implications of those technologies are thoughtful and insightful.

The Guardian of All Things: The Epic Story of Human Memory ...

From cave drawings to oral histories to libraries to the internet, The Guardian of All Things is the history of how humans have relentlessly pursued new ways to preserve and manage memory, both within the human brain and as a series of inventions external to it. Michael S. Malone looks at the story of memory, both human and mechanical, and the historic turning points in that story that have not only changed our relationship to memory, but have also changed our human fabric.
