**Fix Screen Resolution Problem in Windows 10 - YouTube**  
I am using a 1080p smart TV for a monitor and the highest resolution my display settings will adjust to is 1600 x 900. It was running fine at full screen before the most recent updates to windows 8.1 (my OS). Now my screen has the notorious black border and no option to resume the once held resolution. Nothing has changed except windows updates.

**Windows 8.1 Screen Resolution Problems**  
If anyone else seems to be running into this issue, Windows 8.1 added a new feature called "Desktop Display Scaling" to scale things differently on different displays. For example, on a smaller screen with higher resolution, you could have Windows slightly enlarge for readability. This option is enabled by default.

**Windows 8.1 - Monitor Resolution not detected properly ...**  
Different versions of Windows and application development models have different display scaling capabilities and limitations. For example, in Windows that were released earlier than Windows 8.1, desktop environment and applications understand only one scale factor, generally based on the primary display at the time that the logon session starts.
